Saebo Expands Presence in Germany

Leading Rehabilitation Hospitals in Germany Now Offer Saebo Products

Charlotte, NC – May 24th, 2008 - Saebo, Inc., a leading international provider of innovative stroke rehabilitation products, announced today that it has trained the inpatient therapy department at the prestigious **Neurologische Klinik** in Bad Aibling, Germany (located approximately 35 miles SE of Munich) in the use of its upper extremity products. They join the **Universitaets Klinik Fuer Neurologie** in Hamburg-Eppendorf, as the first two facilities in Germany to offer the groundbreaking Saebo Arm-Training Program.

“We are proud to have two of the leading Rehabilitation Centers in Germany offering our products and programs to their patients,” stated Henry Hoffman, President of Saebo. “We are very excited by the continued adoption of our technology by leading international rehab facilities.”

The **Universitaets Klinik** is the largest hospital in the Hamburg Region with approximately 1,400 hospital beds. Each year the medical center treats approximately 50,000 inpatients, 250,000 outpatients, and 50,000 emergency patients.

As a university hospital, the **Universitaets Klinik** offers patients a complete range of treatment options while implementing new research ideas and approaches for the diagnosis and therapy of diseases. For the Hamburg region, many therapies and complicated surgical procedures, especially in the field of transplantation (heart, liver, kidney, and bone marrow), can only be performed at the UKE.

The **Neurologische Klinik Bad Aibling** is one of the largest neurological rehabilitation centres in Europe, focused primarily on patients suffering from stroke, traumatic brain injury or another neurological condition, such as, Parkinson's disease, Huntington's disease, Multiple Sclerosis and Guillain-Barre' syndrome, among others.

The **Neurologische Klinik** is a leader in state-of-the-art rehabilitation technology in Europe, offering treatment for all phases of patient rehabilitation, from In-Patient to Out-Patient to Advanced Follow-up Rehabilitation.

Contact information for the two German facilities can be found on the Saebo website (www.saebo.com) under the “Saebo International” section.

About Saebo, Inc.

Saebo, Inc. is a global provider of innovative rehabilitation products for stroke survivors and other neurologically impaired individuals. Headquartered in Charlotte, NC, the company was founded in 2001 by two occupational therapists specializing in stroke rehabilitation. As the leading cause of long-term disability in the U.S., stroke affects over 700,000 Americans every year, leaving many with crippling side effects, including the loss of hand function. Saebo's pioneering treatment protocols are based on new research documenting the brain's remarkable ability to "re-program" itself following injury. The company's neurological orthotic devices, including the ground-breaking *SaeboFlex* and *SaeboReach*, allow patients with very little residual hand function to immediately begin grasping and releasing objects in high repetition exercises, thereby forging new pathways in the brain. Named *Most Valuable Product* in 2008 by *Therapy Times*, the *SaeboFlex* and *SaeboReach* are now offered as treatment options at over 1,500 clinics and hospitals nationwide, including 22 of the "Top 25 Rehabilitation Hospitals" as ranked by *U.S. News & World Report*. Most Saebo products are eligible for reimbursement by Medicare and most commercial insurers. With a network of over 3,400 trained clinicians spanning four continents, Saebo is committed to helping stroke survivors around the globe achieve a new level of independence.
