Saebo UK Posts Record 2008; Sees Continued Growth in the United Kingdom for 2009

National Health Service (NHS) hospitals usage dictates increase in staff and Saebo-trained therapists to accommodate product demand

Charlotte, NC – March 4, 2009 - Saebo, Inc., a leading global provider of innovative stroke rehabilitation products, announced today that its subsidiary, Saebo UK, Ltd., had another record year in 2008 and has added staff to accommodate its continued expected growth in 2009.

"2008 was another record year for Saebo UK," said Managing Director, Glyn Blakey. "In the second half of 2008 alone, we trained an additional 80 Physiotherapists and Occupational Therapists, bringing the total to over 250 Saebo-trained therapists throughout the United Kingdom. To keep up with our growth, we have hired additional trainers and technical support personnel, and have also added some administrative staff to ensure that we continue to provide excellent service to our customers."

"In 2008, we were also successful in selling the Saebo In-Patient Treatment Programme to a number of leading National Health Service (NHS) hospitals. These hospitals have embraced Saebo's products and we continue to have good success selling the In-Patient Treatment Kit to NHS facilities so far in 2009," Blakey concluded.

Henry Hoffman, President of Saebo, Inc. added, "Saebo UK was a big contributor to our overall success in 2008. Glyn and his team have done a great job of building the business and the Saebo brand throughout the UK. The traction that we are now gaining with the NHS, combined with the increase in the number of Saebo-trained therapists bodes well for another great year for Saebo UK."

About Saebo UK, Ltd.

About Saebo, Inc.

Saebo, Inc. is a global provider of innovative rehabilitation products for stroke survivors and other neurologically impaired individuals. Headquartered in Charlotte, NC, the company was founded in 2001 by two occupational therapists specializing in stroke rehabilitation. As the leading cause of long-term disability in the U.S., stroke affects over 700,000 Americans every year, leaving many with crippling side effects, including the loss of hand function. Saebo's pioneering treatment protocols are based on new research documenting the brain's remarkable ability to "re-program" itself following injury. The company's neurological orthotic devices, including the ground-breaking *SaeboFlex* and *SaeboReach*, allow patients with very little residual hand function to immediately begin grasping and releasing objects in high repetition exercises, thereby forging new pathways in the brain. Named *Most Valuable Product* in 2008 by *Therapy Times*, the *SaeboFlex* and *SaeboReach* are now offered as treatment options at over 1,500 clinics and hospitals nationwide, including 22 of the "Top 25 Rehabilitation Hospitals" as ranked by *U.S. News & World Report*. Most Saebo products are eligible for reimbursement by Medicare and most commercial insurers. With a network of over 3,400 trained clinicians spanning four continents, Saebo is committed to helping stroke survivors around the globe achieve a new level of independence.
