

Saebo Featured on the Cover of New Leading Spasticity Text Book

Spasticity: Diagnosis and Treatment is the first book solely dedicated to the diagnosis and treatment of spasticity

Charlotte, NC – November 12, 2010 - Saebo, Inc., a leading international provider of innovative stroke rehabilitation products, was featured in a new, cutting-edge neurological text book entitled "Spasticity: Diagnosis and Treatment". The book, co-authored by Dr. Allison Brashear and Dr. Elie Elovic, is divided into five sections ranging from the science of spasticity to assessment tools and appropriate therapy interventions including the role of emerging technologies.

Henry Hoffman, Saebo's President, commented, "We are very pleased to be featured on the front cover of the Spasticity book. The SaeboReach and SaeboFlex were specifically developed to assist patients with decreasing spasticity while improving overall arm and hand function. The authors did an impeccable job providing a comprehensive review that will be an excellent resource for physicians, therapists and other members of the spasticity management team."

About Saebo, Inc.

Saebo, Inc. is a global provider of innovative rehabilitation products for stroke survivors and other neurologically impaired individuals. Headquartered in Charlotte, NC, the company was founded in 2001 by two occupational therapists specializing in stroke rehabilitation. As the leading cause of long-term disability in the U.S., stroke affects over 700,000 Americans every year, leaving many with crippling side effects, including the loss of hand function. Saebo's pioneering treatment protocols are based on new research documenting the brain's remarkable ability to "re-program" itself following injury. The company's neurological orthotic devices, including the ground-breaking SaeboFlex and SaeboReach, allow patients with very little residual hand function to immediately begin grasping and releasing objects in high repetition exercises, thereby forging new pathways in the brain. Named *Most Valuable Product* in 2008 by *Therapy Times*, the SaeboFlex and SaeboReach are now offered as treatment options at over 1,700 clinics and hospitals nationwide, including 22 of the "Top

25 Rehabilitation Hospitals” as ranked by *U.S. News & World Report*. Most Saebo products are eligible for reimbursement by Medicare and most commercial insurers. With a network of over 5,000 trained clinicians spanning four continents, Saebo is committed to helping stroke survivors around the globe achieve a new level of independence.
