HOW TO MEASURE			

**Wrist Position:**     15° - for patients with high tone

**Side:**     Left

35° - for patients with low tone

Right

**Digit Caps:** These measurements correspond to the digit cap ring (used for measuring the fingertips).

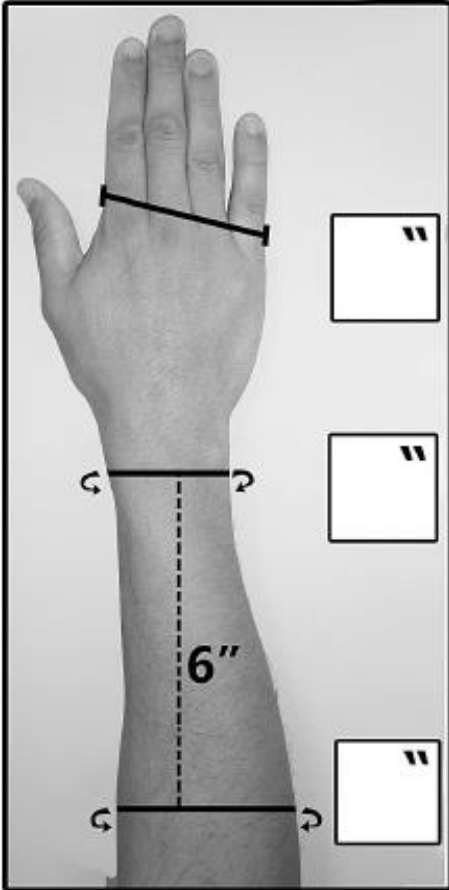

Thumb    \_\_\_\_\_  
Index    \_\_\_\_\_  
Long    \_\_\_\_\_  
Ring    \_\_\_\_\_  
Little    \_\_\_\_\_

**HOW TO MEASURE (continued)**

*Distal Component* Use a measuring tape and record your measurements (in inches) in the spaces provided.

**Measure across your fingers:**

Place the measuring tape just above your knuckles; do not wrap the tape down the side of your fingers.  
*(Clinicians: Measure **across** the MCPs 2 – 5.)*

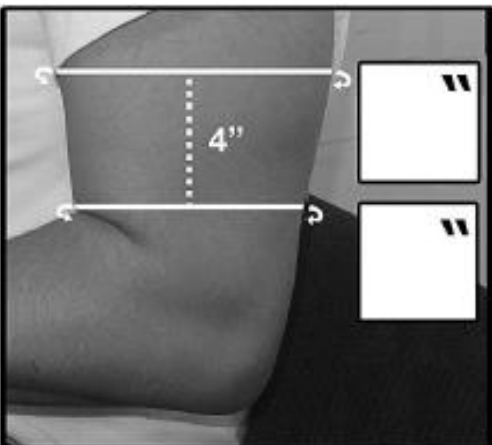

**Measure the circumference of your wrist:**

Wrap the measuring tape around your wrist, just below your wrist bone.  
*(Clinicians: Measure **around** the wrist just proximal to the ulnar head.)*

**Measure the circumference of your forearm:**

Measure 6 inches below your wrist bone and wrap the measuring tape around your forearm.  
*(Clinicians: Measure **around** the forearm 6" proximal from the ulnar head.)*

*Proximal Component*

**Measure the circumference of your arm:**

Wrap the measuring tape around your arm just above the bend at the elbow.  
*(Clinicians: Measure **around** the arm just proximal to the bend at the elbow.)*

**Measure the circumference of your upper arm:**

Measure 4 inches above the bend at your elbow and wrap the measuring tape around your arm.  
*(Clinicians: Measure **around** the arm 4" proximal from the bend at the elbow.)*
