Which Saebo product(s) are recommended for this patient?  
(Check all that apply)

SaeboFlex/SaeboReach

*The SaeboFlex is designed for clients who have some movement in their fingers, but are unable to open their hand due to tightness. This spring-loaded device enables patients to open the ir hand and engage in therapeutic "grasp-and-release" tasks that would otherwise be impossible.*

SaeboGlove

*The SaeboGlove was designed for patients who require some assistance in opening their fingers (but are NOT experiencing "tightness" in their hand). This device can be worn throughout the day to accomplish activities that would otherwise be impossible.*

SaeboStretch

*The SaeboStretch is designed specifically to prevent soft tissue shortening and/or contractures while protecting the finger joints and providing maximum comfort.*

SaeboStim Micro

*The SaeboStim Micro provides sensory electrical stimulation (SES) to both the hand and arm. It provides a very low level of stimulation delivered over a much longer period of time.*

Saebo AvivaStim

*The Saebo AvivaStim is an affordable, easy-to-use device which can provide the stimulation needed to increase strength and function. Clients with limited movement are encouraged to use electrical stimulation to strengthen their weakened muscles.*

SaeboStep

*The SaeboStep was designed for clients who suffer from foot drop, but have some movement in the foot/ankle. The design features a patented dial tensioner that lifts the foot quickly and easily.*
